

NSR Sports Partners with Kayakers Go Coastal, Inc

(3/31/2010) NSR Sports, a division of MedHesives Inc, has formed a sales and marketing partnership with Rhonda Schwab, owner and operator of Kayakers Go Coastal, Inc., to bring kayaking and other paddle sports repairs into a new era.

As an avid kayaker and certified BCU (British Canoe Union) Coach Level 2, Ms. Schwab is very actively involved with the Sea Kayaking committee. She is a member of the Mountaineers and Washington Kayak Club in the Seattle and Tacoma area, and spends most weekends' sea kayaking on the waters of Puget Sound or paddling in the San Juans and along the coast of Washington.

The owner of Kayakers Go Coastal since 2001, Rhonda teaches and coaches the fundamentals of sea kayaking. She also repairs, from minor to major damage on sea kayaks, surf boats, white water boats, surf boards, surf kayaks, paddle boards, or canoes. Rhonda offers classes to individuals on repairing their own kayaks.

NSR Sports developed the Paddle Sports Rapid Repair Kit so that individuals can repair leaks, cracks or holes that develop in kayaks and canoes. The resin requires no mixing and can cure at temperature extremes beyond 28°F and 104°F without impacting strength characteristics or cure time. The kit can be used both for emergency repairs under wet conditions, or used on-shore for routine maintenance, and is compatible with most materials, including polyethylene, polypropylene and carbon fiber used in making today's kayaks and canoes.

About North Sea Resins:
